

Specializing in Asset Recovery & Recycling Services for All of Your I.T. Equipment

Established in 2010, IT-Re, Inc. provides a full array of asset recovery, recycling and data destruction services for all types of I.T. equipment. We cater to businesses, hospitals, government agencies, schools and universities. Our mission is to provide the most innovative, easy and secure solutions for asset recovery and environmentally safe disposal of I.T., telecommunications and mobile electronic equipment.

I.T. ASSET RECOVERY

Put money back into your I.T. budget by selling us your retired and surplus equipment or allowing us to sell it for you on consignment.

SECURE DATA DESTRUCTION

We offer secure data destruction services by means of a NIST 800-88 compliant wiping software. This allows us to securely overwrite all data, making any type of data recovery impossible.

RECYCLING

We provide environmentally responsible disposal of non-working equipment, e-waste and equipment beyond its usable shelf life.
